The information in the PFBS toxicity assessment may be used by federal partners, states, tribes, and local communities, along with specific exposure and other relevant information to determine, under the appropriate regulations and statutes, if and when it is necessary to take action to address potential risks associated with human exposures to PFBS.

- <!--[if !supportLists]--><!--[endif]-->[Memo: Toxicity Assessment for PFBS \(PDF\)](#)(5 pp, 213 K, January 15, 2021)

OCSPP provided this memo to advance cross-office consistency and coordination. OCSPP was an important part of the Agency workgroup on the Assessment. The memo identifies key considerations regarding the application of a database deficiency uncertainty factor for both chronic and subchronic toxicity, taking into account data needs.
